Source: Health Care Survey of DoD Beneficiaries

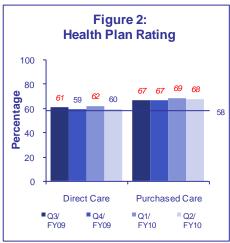

## Inside Consumer Watch

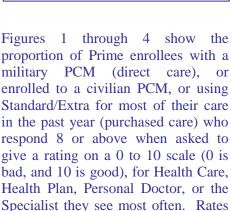

TRICARE Consumer Watch is a brief summary of what TRICARE users in US MHS say about their healthcare. Data are taken from the Health Care Beneficiaries Survey ofDoD (HCSDB). The HCSDB includes from the Consumer auestions Assessment of Healthcare Providers and Systems (CAHPS), a survey designed to help consumers choose among health plans.

Rates are compared with averages taken from the 2009 National CAHPS Benchmarking Database (NCBD), which contains results from surveys given to beneficiaries by civilian health plans. Rates differing significantly from the benchmark are bolded and shown in red. In 2009, questions from a new version of CAHPS (Version 4) were introduced.

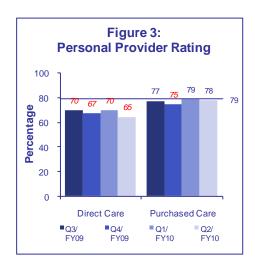

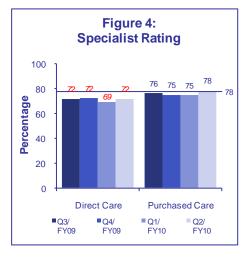

are adjusted for age and health status.

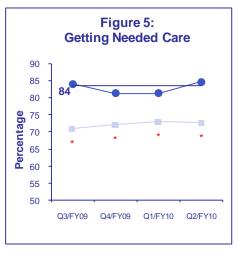

## **Health Care Topics**

Health Care Topics scores average together results for related questions. Each score is the percentage who "usually" or "always" got treatment they wanted. Asterisks show values significantly different from the NCBD benchmark (p < .05).

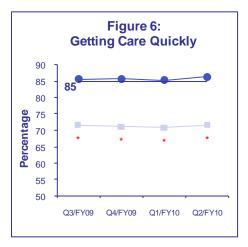

Figure 5 presents the composites "Getting needed care". Scores are based on patients' problems getting referrals and approvals and getting needed treatment.

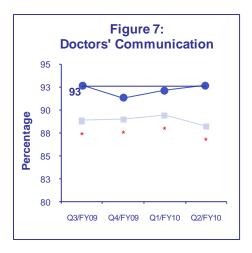

## US MHS • Quarter 2 FY 2010

"Getting care quickly", shown in Figure 6 scores concern how long patients wait for an appointment or wait in the doctor's office.

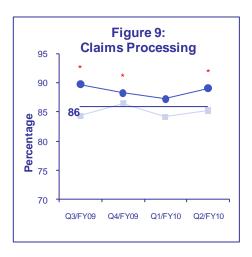

Scores in Figure 7, "Doctor's communication" are based on whether the doctor spends enough time with patients, treats them respectfully and answers their questions.

Figure 8 shows "Customer service" scores, which concern patients' ability to get information about their health plan. "Claims processing" scores in Figure 9 are based on the timeliness and correctness of plan's claims handling.

## **Preventive Care**

The preventive care table compares TRICARE users' rates for diagnostic screening tests and smoking cessation with goals from Healthy People 2010, a government initiative to improve Americans' health by preventing illness. A new metric for the nonsmoking rate is used: current nonsmokers. Rates that are significantly different (p < .05) from the Healthy People 2010 goal are shown by red italics.

Preventive Care					
Type of Care	Qtr 3 FY 2009	Qtr 4 FY 2009	Qtr 1 FY 2010	Qtr 2 FY 2010	Healthy People 2010 Goal
Mammography (women >		2009	2010	2010	2010 G0a1
Direct Care	88	88	87	86
